

Vorlesung “Spezialfragen der Bauphysik”
13. Jan. 2006, ETH Zurich

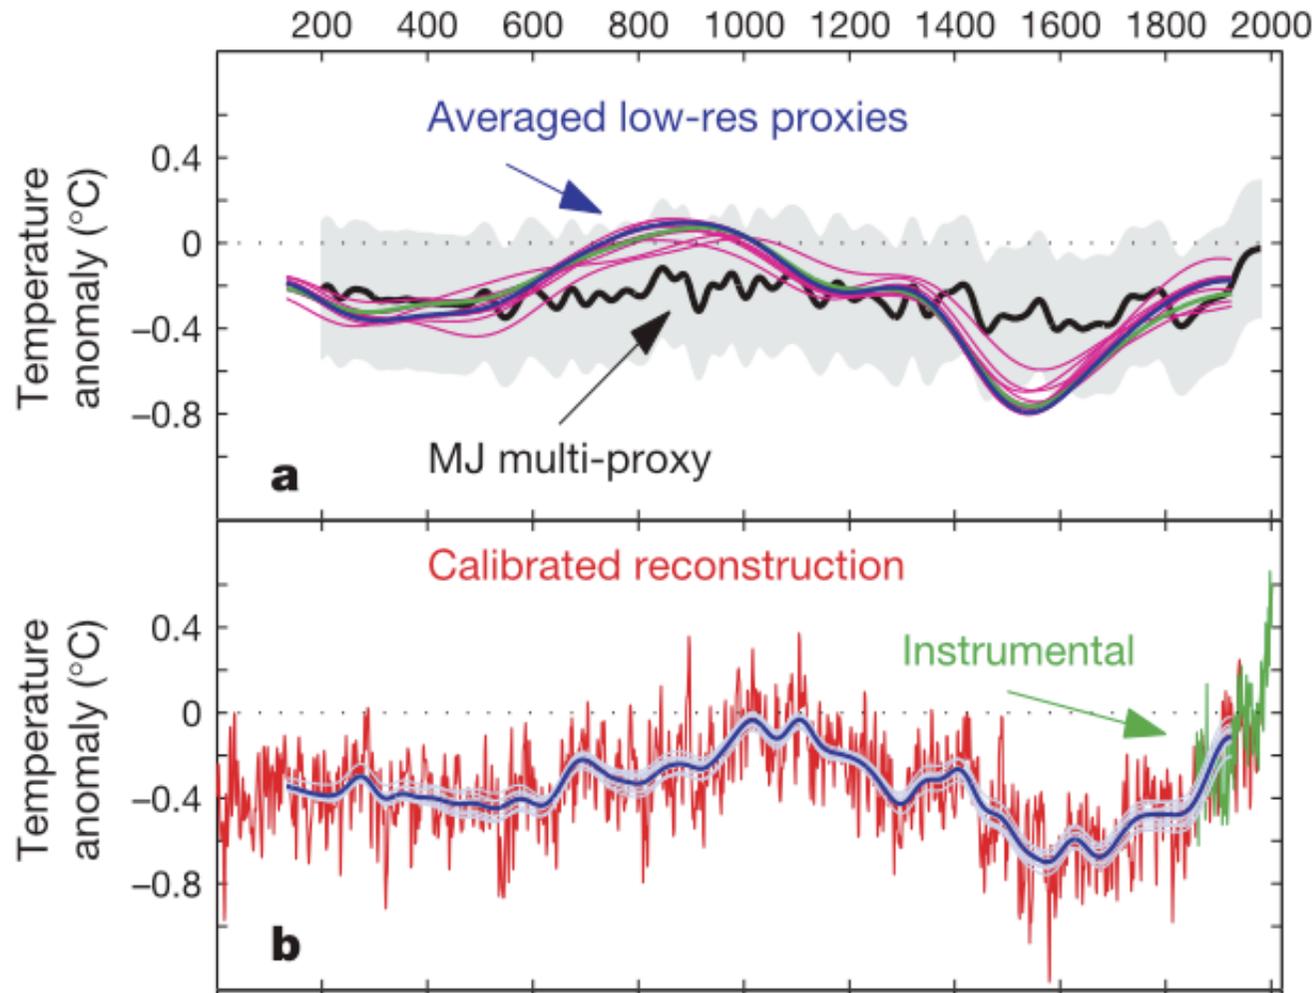

Klimawandel, Klimamodelle und Szenarien für die Schweiz

D. Gyalistras
Systemökologie ETHZ
<http://www.climate-impacts.ch>

Übersicht

- I. Klimavariabilität und Klimawandel
- II. Klimamodellierung
- III. Regionale Klimaszenarien

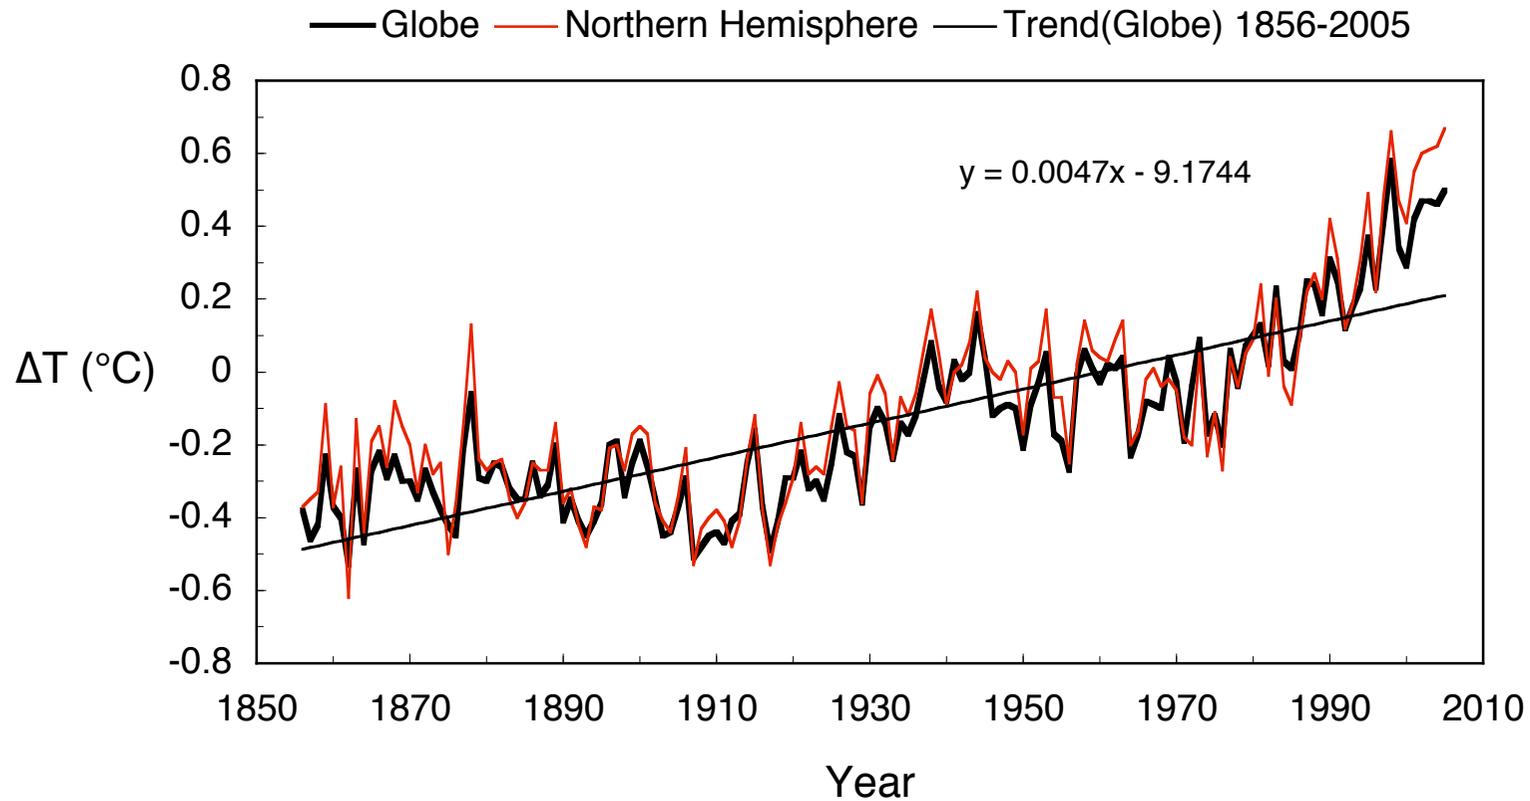

Nordhemisphärische Temperatur-Rekonstruktionen für die letzten 2000 Jahre

Moberg et al. 2005, Nature

Messungen für die letzten 150 Jahre (Globus)

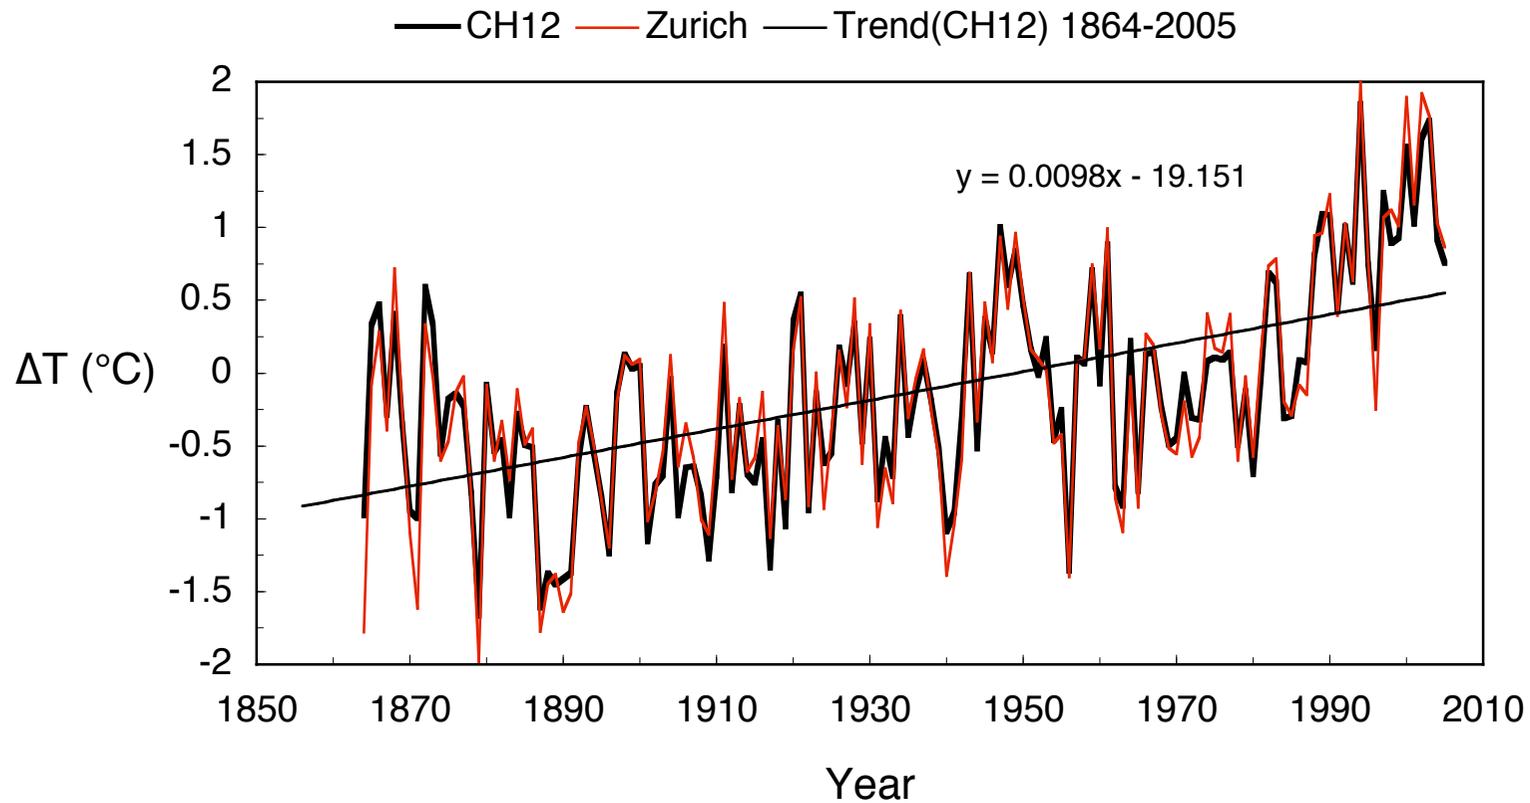

Annual Mean Temperature Anomalies
(Data for Jan 1856 – Nov 2005)

Data from <http://www.cru.uea.ac.uk/cru/climon/data/themi/>

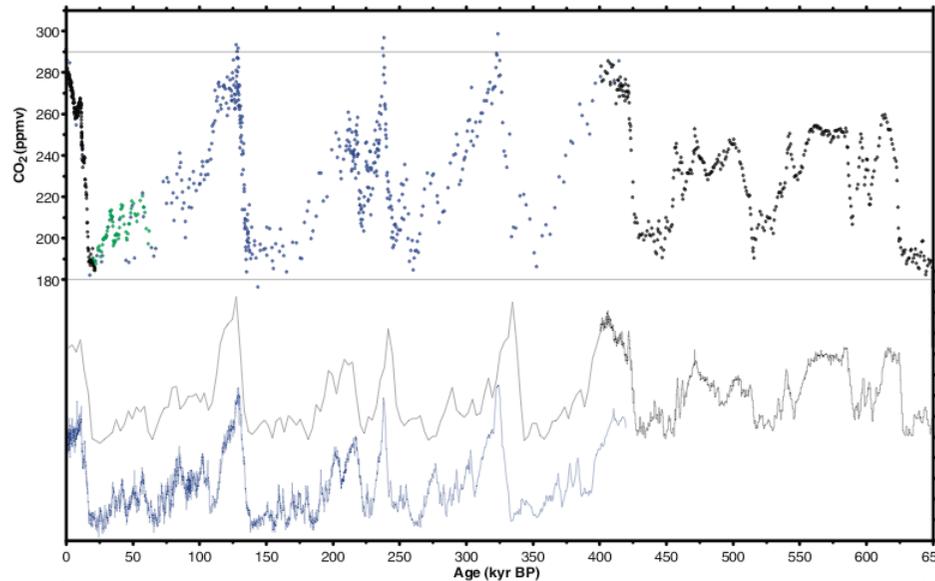

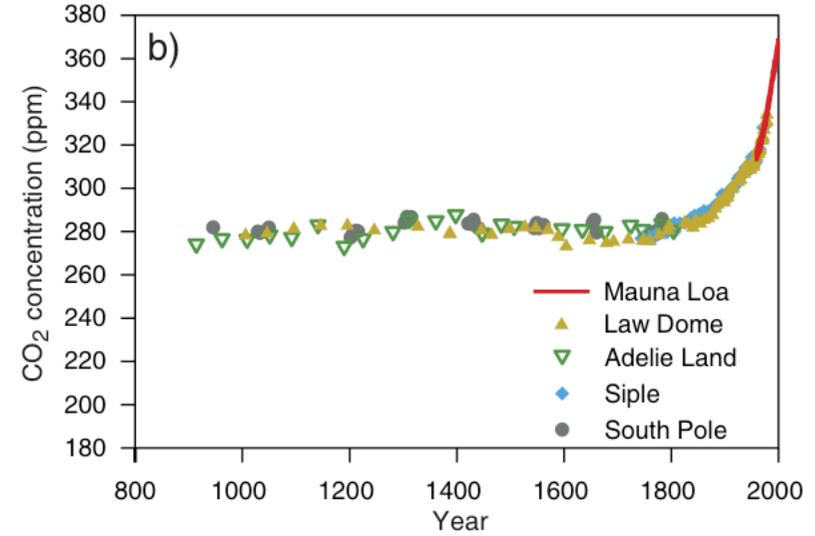

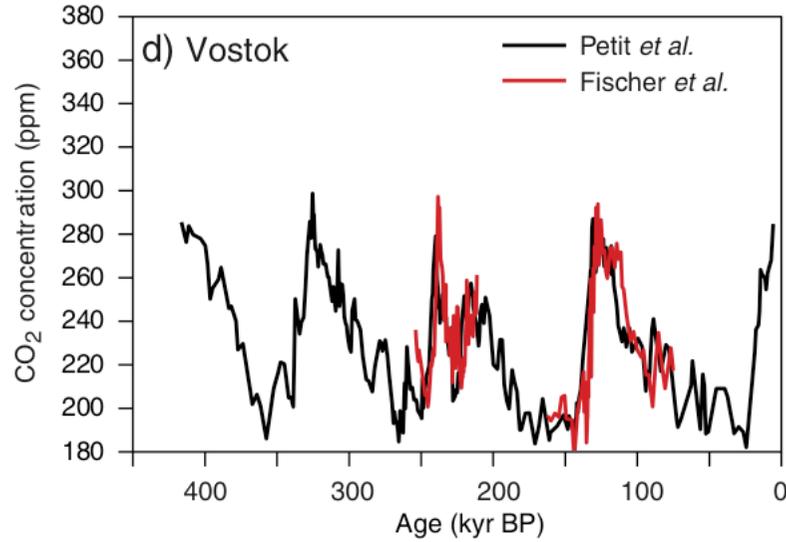

Messungen für die letzten 150 Jahre (Schweiz)

Annual Mean Temperature Anomalies
(Data for Jan 1864 – Nov 2005)

after Begert et al. (2003), MeteoSwiss (updated)

Entwicklung des atmosphärischen CO₂-Gehalts

← 290 ppm

← 180 ppm

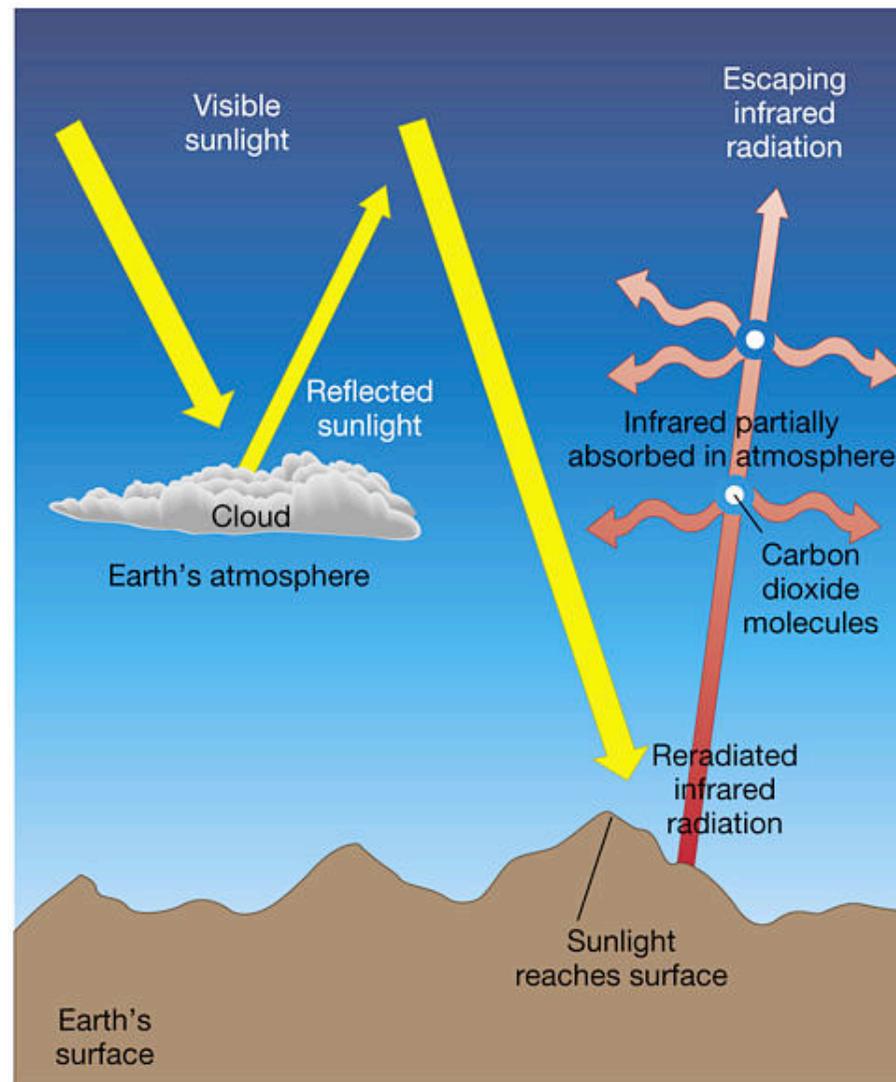

Prentice *et al.* (2001),
IPCC WG1 Report

Siegenthaler *et al.* (2005), Science

0

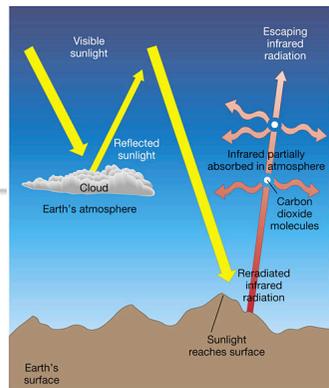

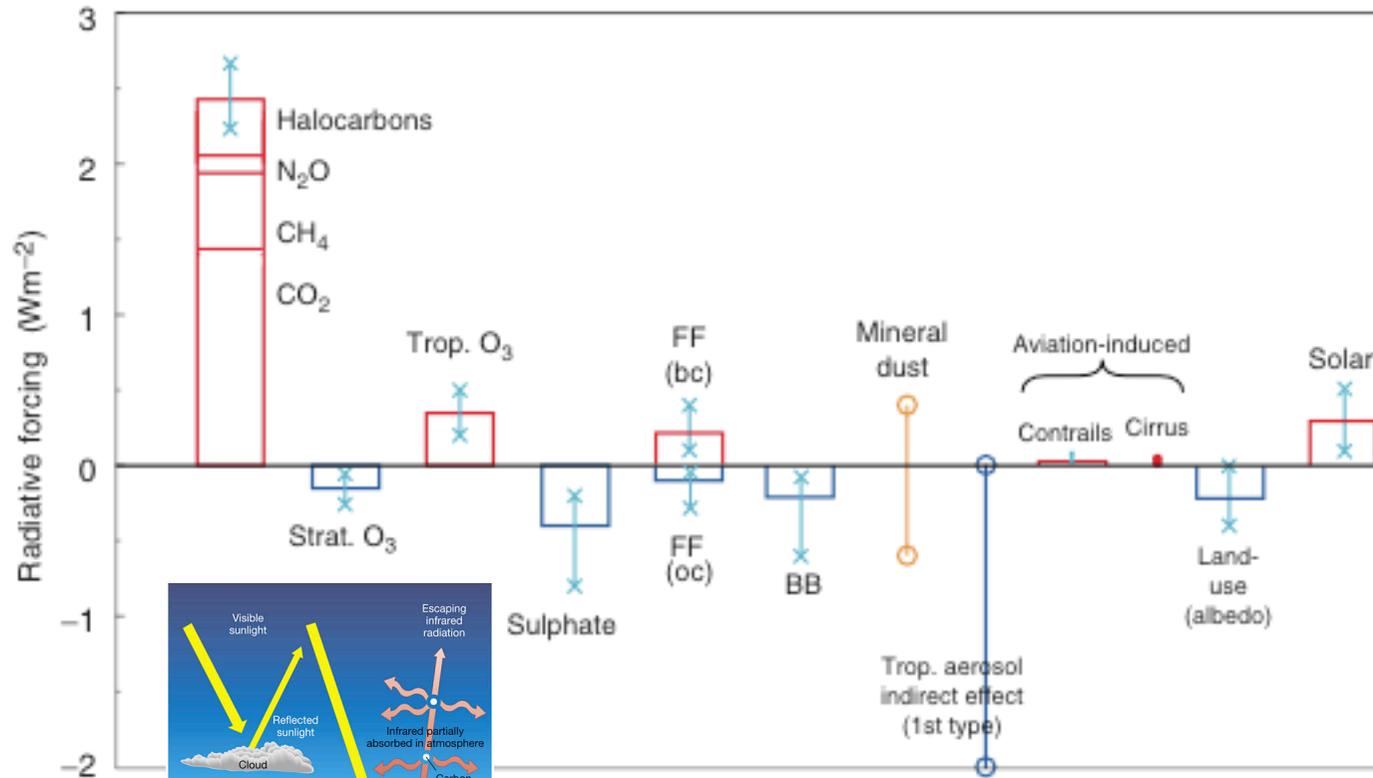

650 kyr BP

Treibhauseffekt

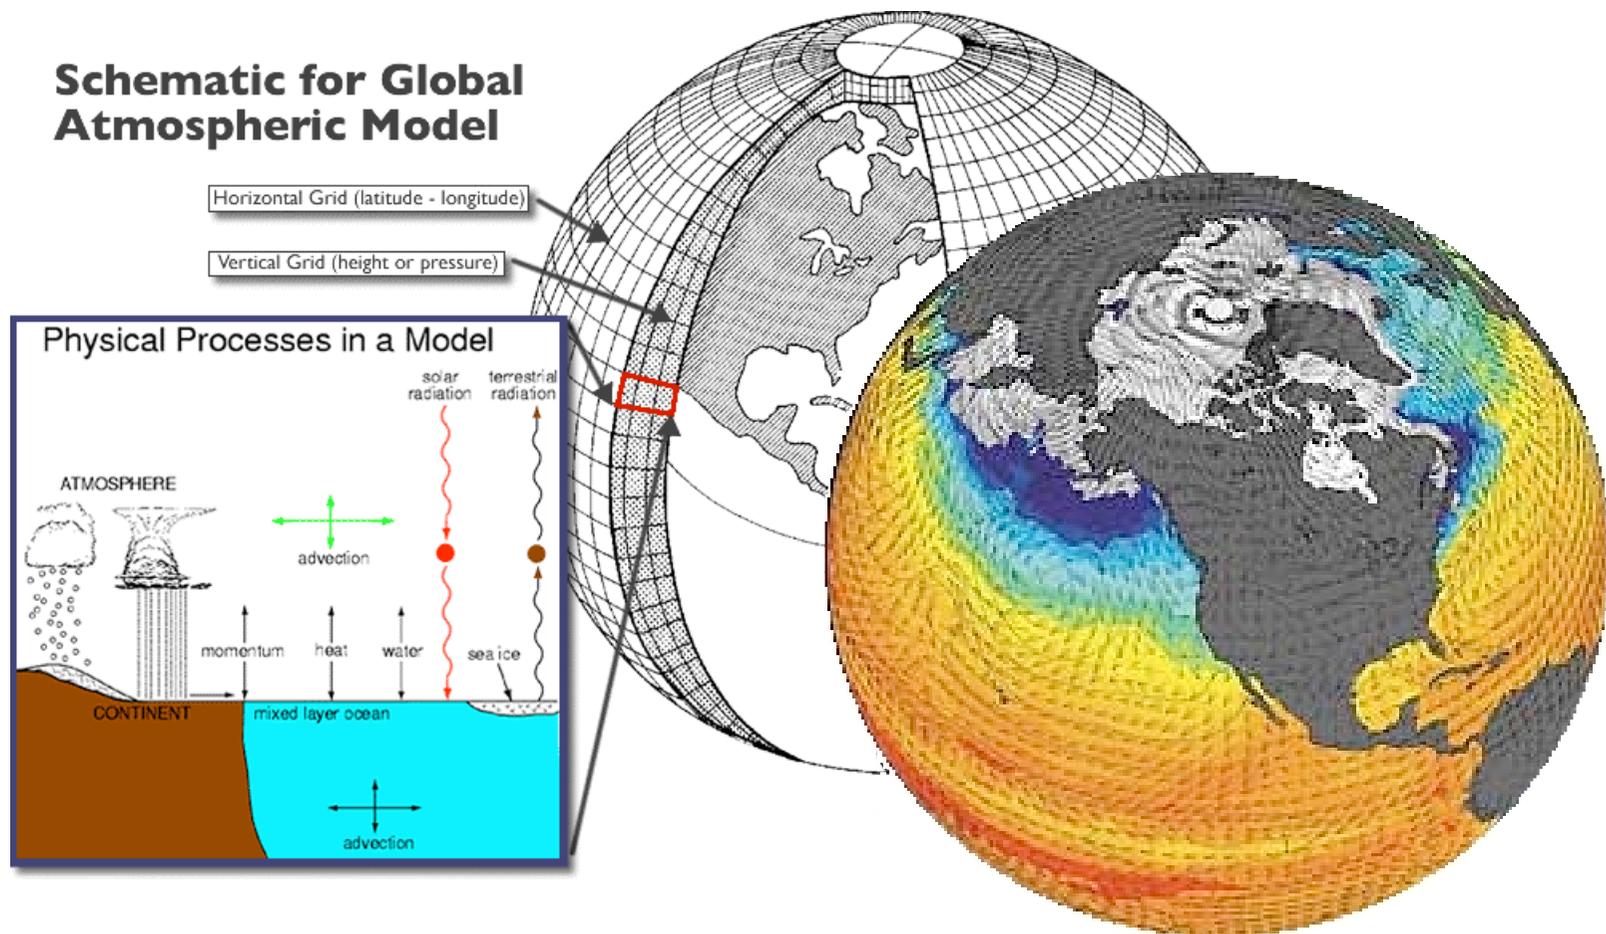

Forcings

Global and annual mean radiative forcing (1750 to present)

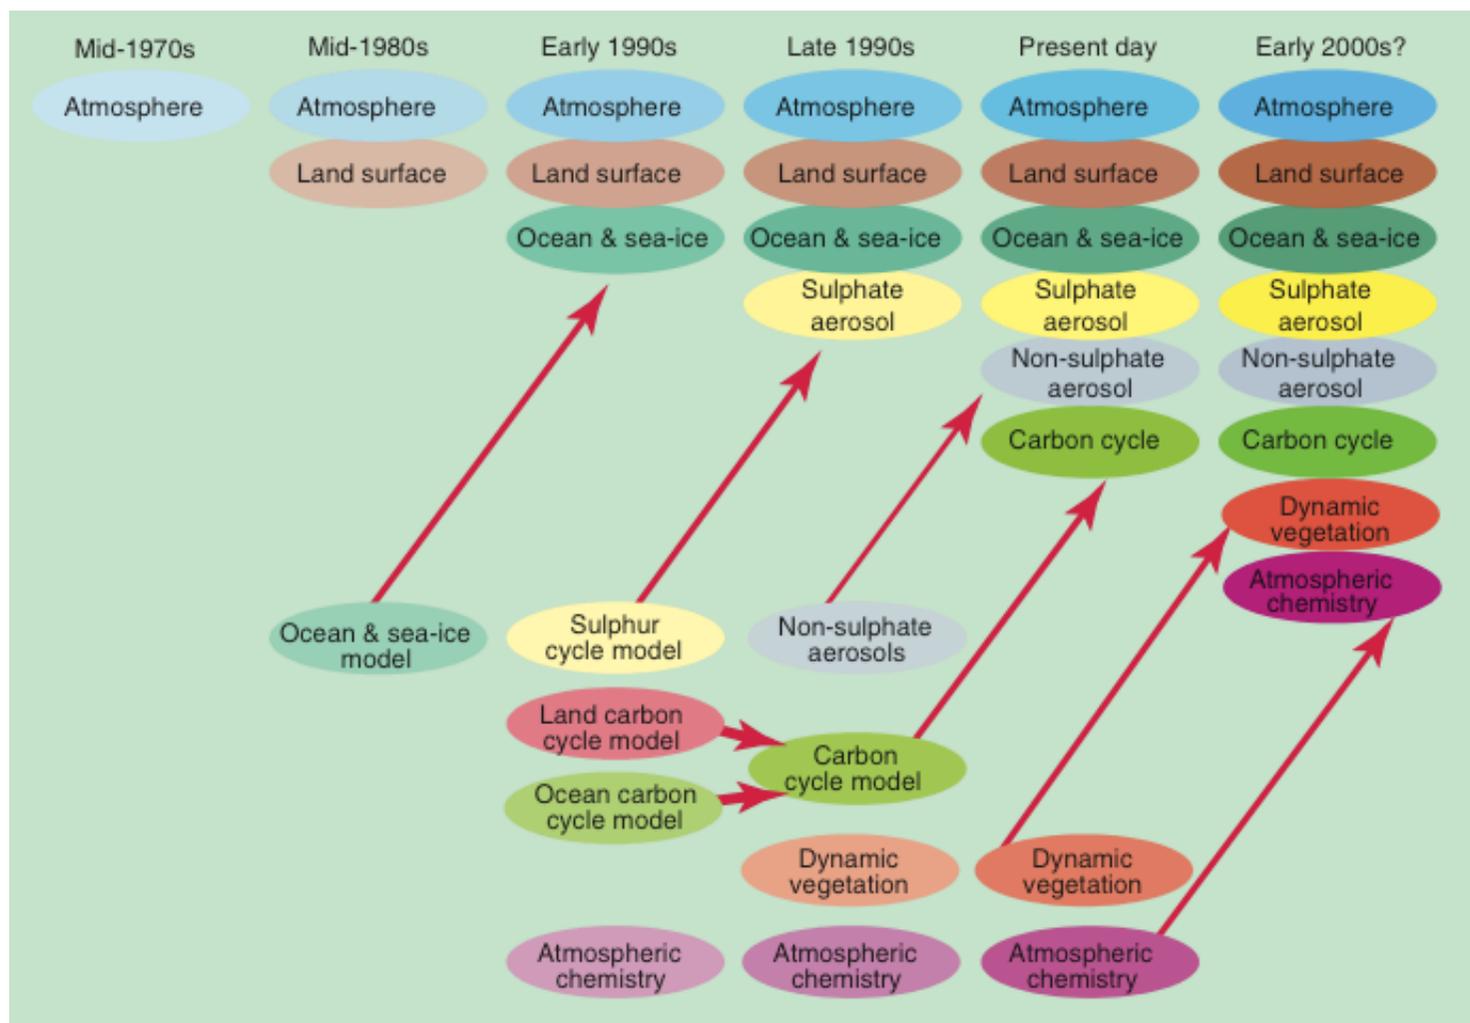

Boucher et al. (2001),
IPCC WG1 Report

Globale Klimamodelle

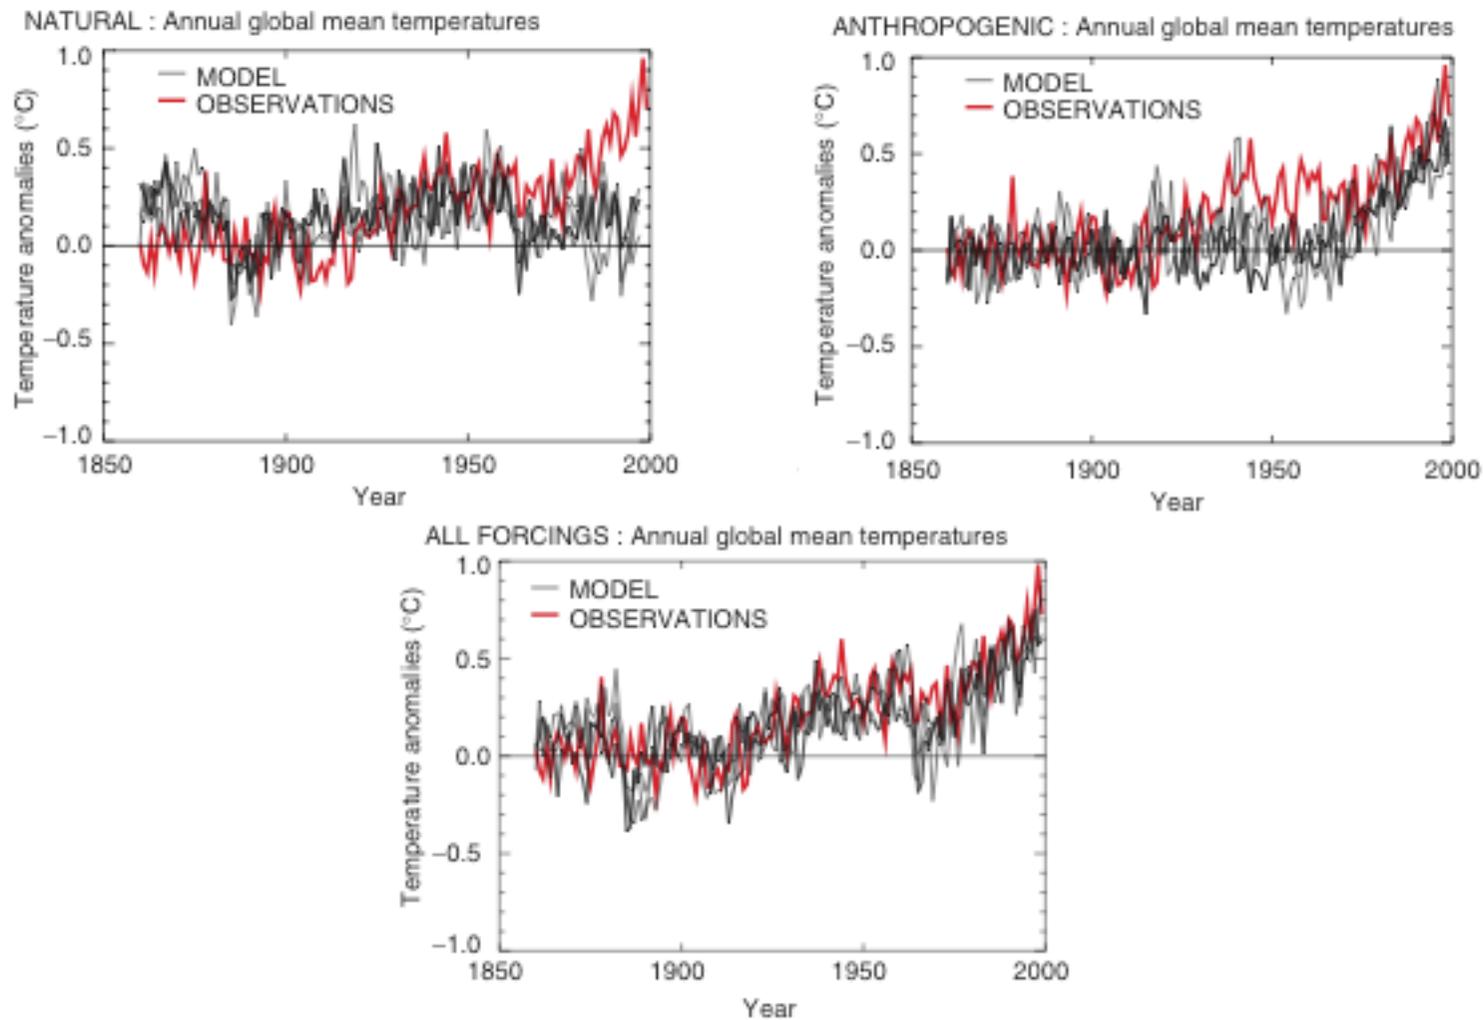

Entwicklung der globalen Klimamodelle

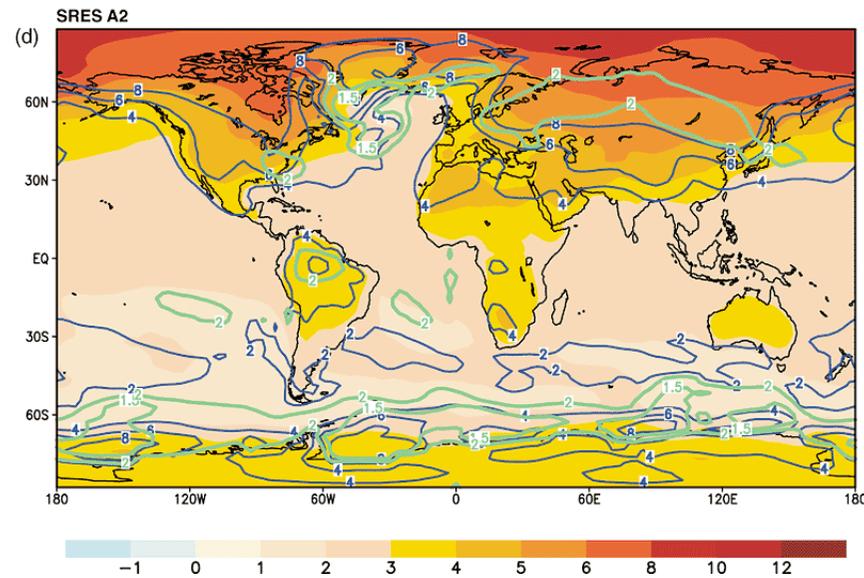

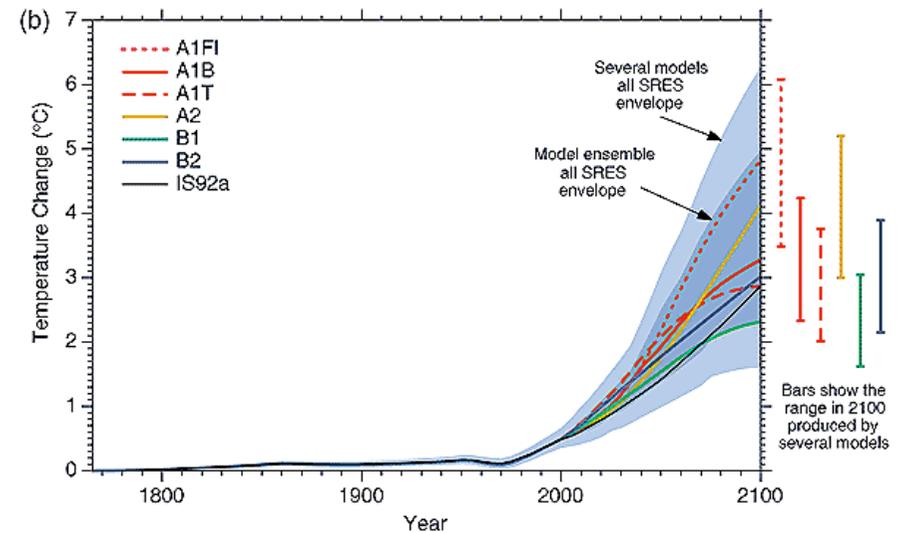

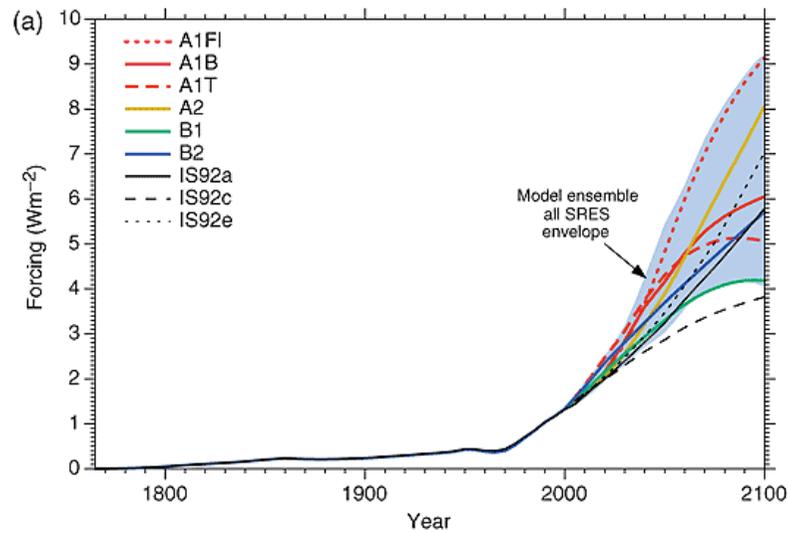

IPCC TAR (2001), WG I Technical Summary

Globale Klimasimulationen für die letzten 120 Jahre

IPCC TAR (2001), WG I Technical Summary

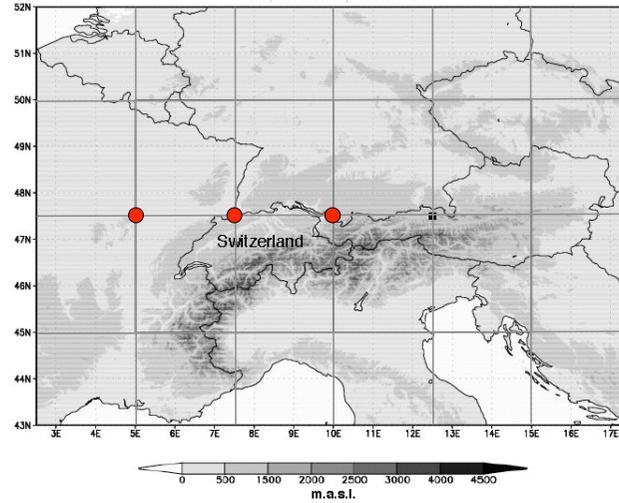

Globale Klimasimulationen für das 21. Jh.

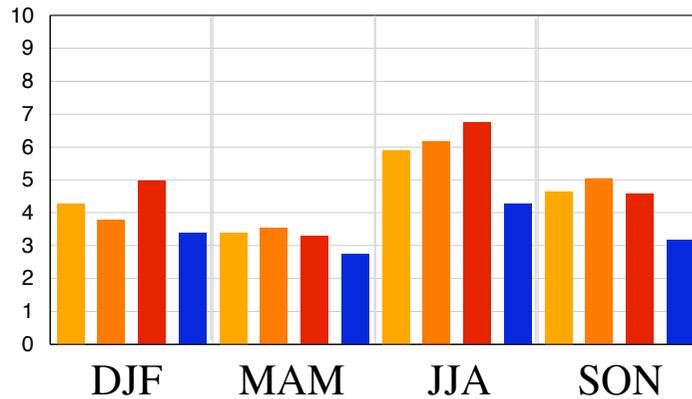

Cubasch et al. (2001), IPCC WG1 Report

GCM-Simulierte Veraenderungen für 2071-2100

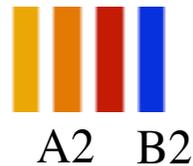

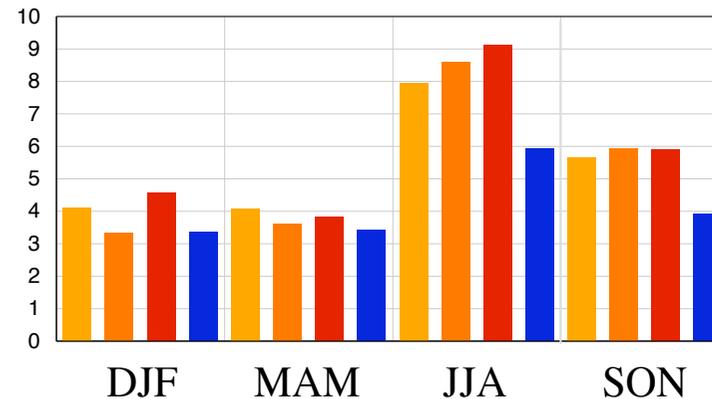

(Modell "HadAM3", Forcings "A2" und "B2")

ΔT_{min}

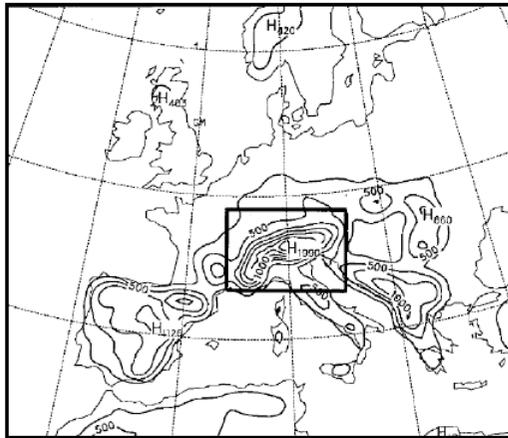

ΔT_{max}

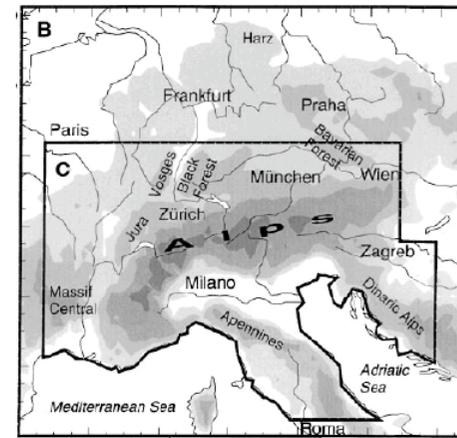

Problem der begrenzten räumlichen Auflösung von Klimasimulationen

Horizontale Auflösung ~50 km

Giorgi et al. (1997)

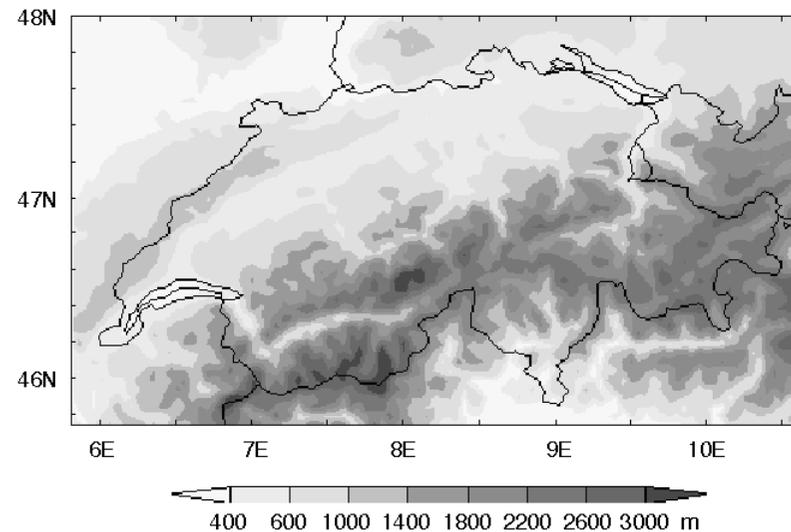

Horizontale Auflösung ~20 km

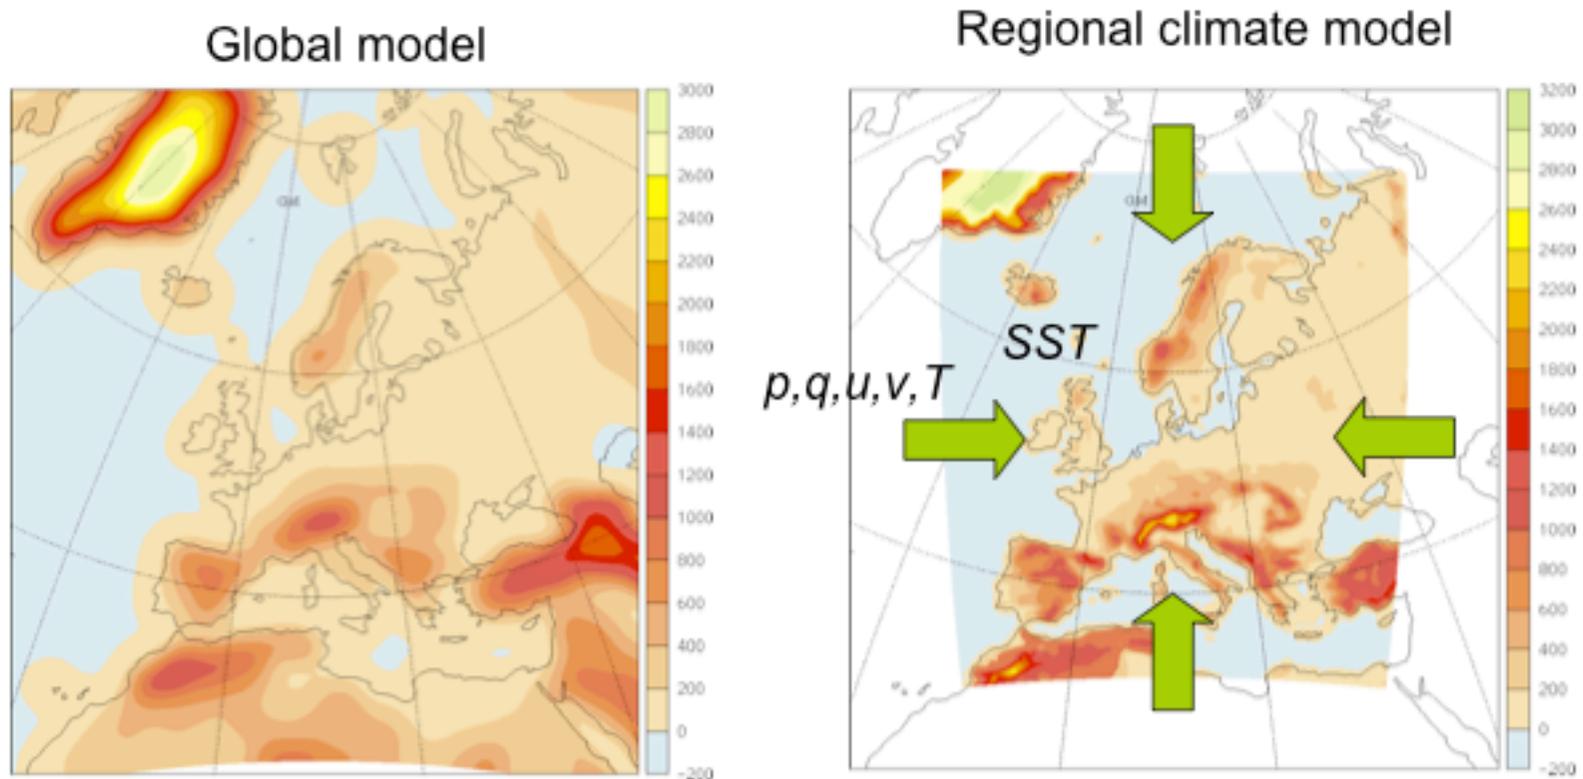

200 500 1000 2000 m

Fuentes & Heimann (2000)

Horizontale Auflösung ~1 km (0.05°)

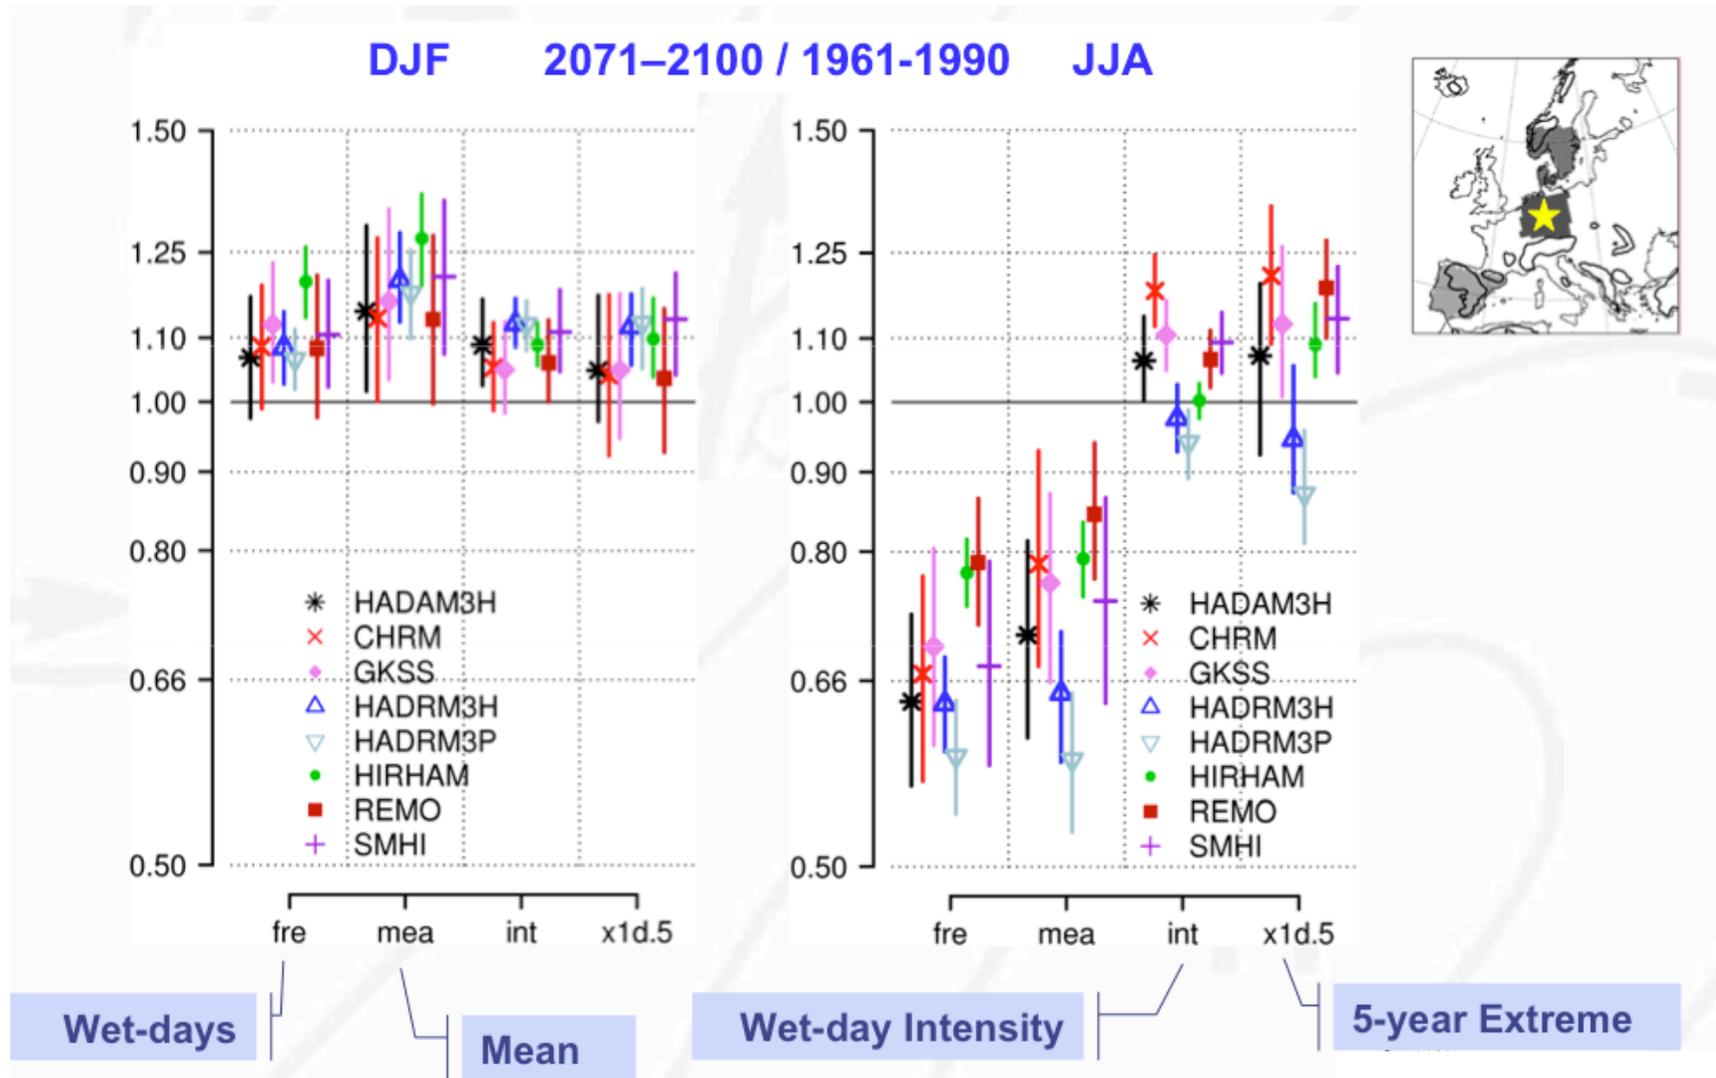

Regionale Klimamodelle

The large-scale circulation patterns of the RCM simulation are determined by the boundary conditions

Seneviratne (2005), WS Climate Scenarios, ETH Zurich, 30. Sep. 05

Beispiel für Niederschlags-Szenarien

Frei (2005), WS Climate Scenarios, ETH Zurich, 30. Sep. 05

Statistisches Downscaling

Lokales Wetter = $f(\text{grossräumiger Atmosphärenzustand}) + \varepsilon$

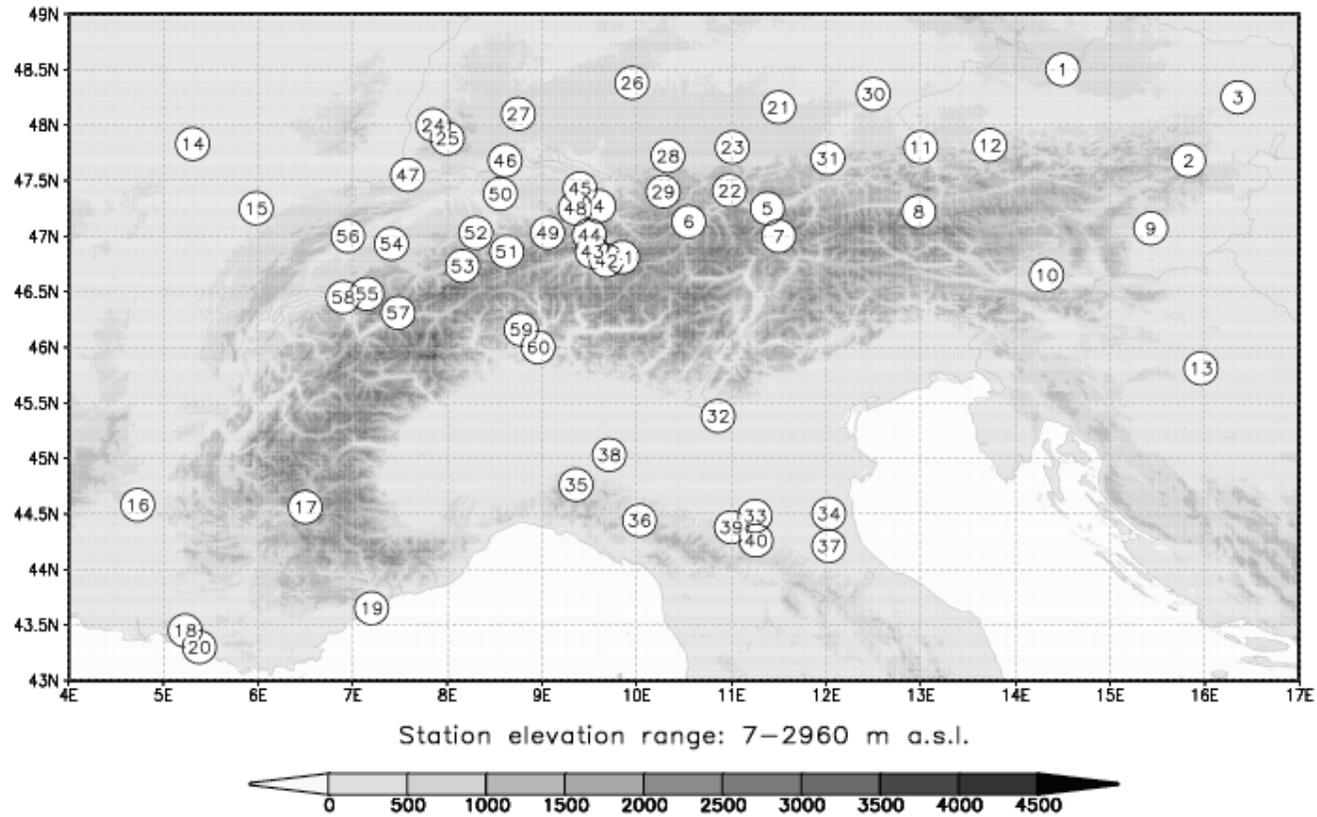

Mögliche Abbildungsfunktionen f :

- Regressionsmodell
- Analogfallsuche
- Neuronales Netzwerk
- ...

Erstellung des empirischen Modells mit Messdaten
Anwendung auf GCM-simulierte Felder

Ausgewählte Klimastationen im Alpenraum

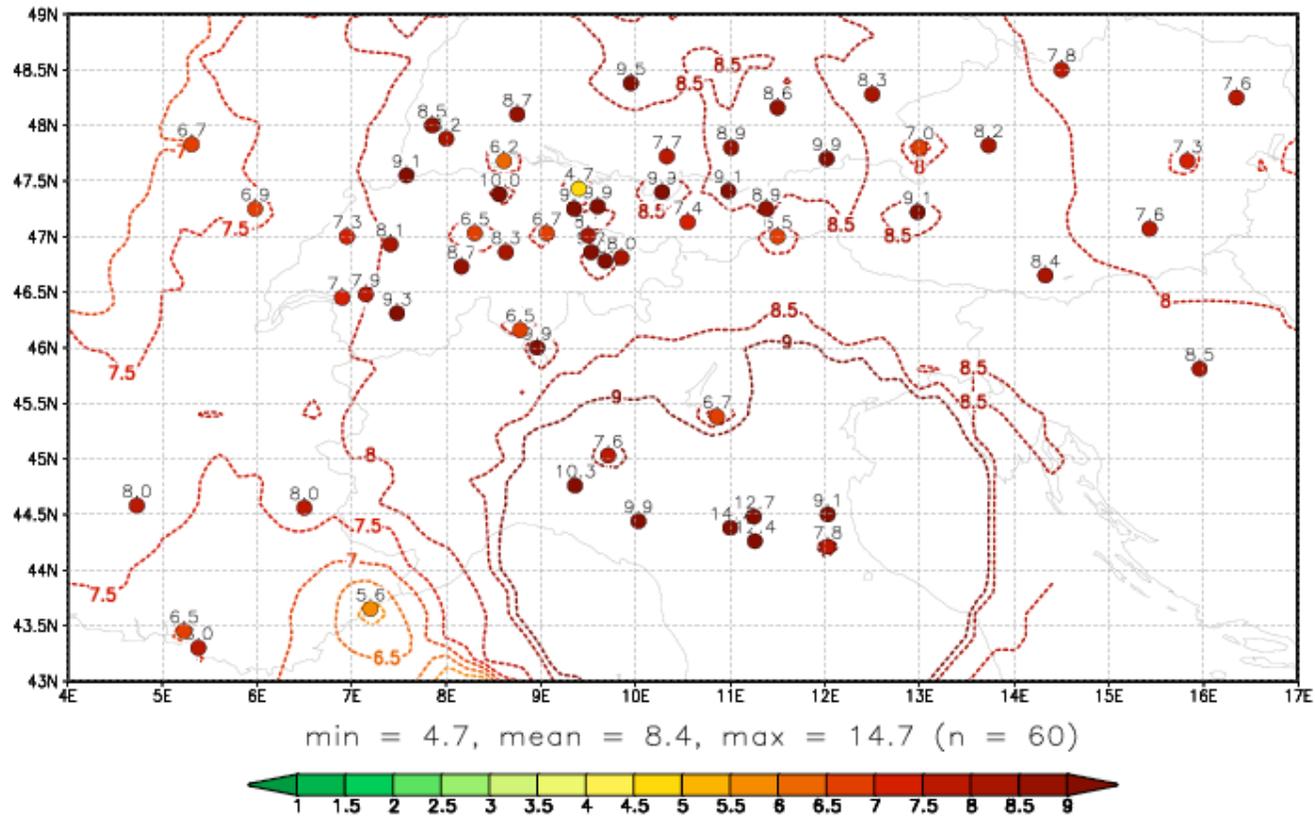

Study Locations

Resultate aus statistischem Downscaling

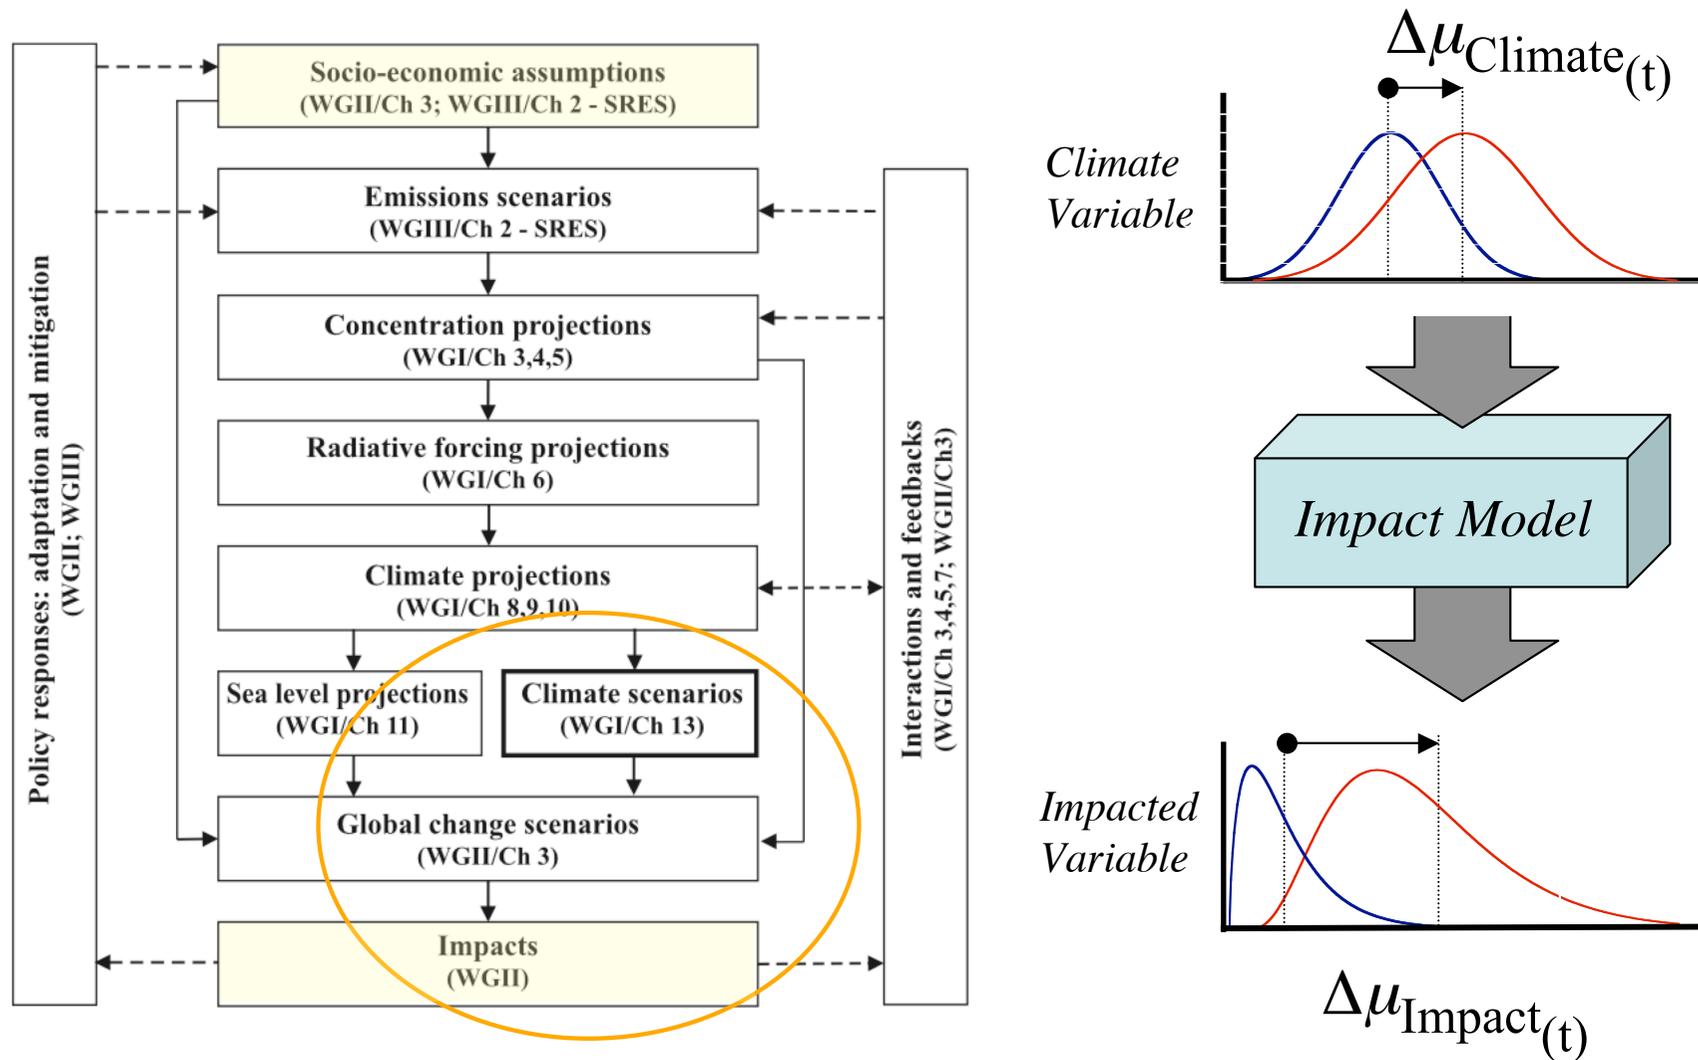

Mögliche Veränderungen im Sommermittel (JJA) von T_{\max}

HadAM3, Scenario A2, $\Delta\mu$ 2070-2100 rel. to 1961-1990

Gyalistras & Schüpbach, in prep.

Typisches Vorgehen bei Klimawirkungsstudien

Mearns *et al.* (2001), IPCC TAR
